1 of 1 people found the following review helpful.

Written with poor English - as if author speaks English as a Second Language

By ACC

From the very first sentences of the introduction and those of the first chapter, this book has glaring English

Language mistakes which make for a very difficult read. It is obvious that the author speaks English as a second language, and never bothered to have a native speaker check his work. I understand this is a business publication so the numbers may be more important than the language, but it is very difficult to learn a new concept if you are forced to read the same sentence several times in order to understand what the author is trying to say. For example (FIRST sentence of second paragraph of "chapter: introduction" sic.): "Similarly, if you will go with adventure to an unknown region (entrepreneur = adventurer) where you will explore it but you do not know its directions or do not even have a map (business map) and you do not know how to use it, as well to overcome many obstacles you will face (SOLUTION)." (sic.) Maybe it's me, but 391 pages written like this are of no help. I have no idea how good the author is in explaining how to put together a feasibility study as I cannot bring myself to keep reading. (This is why I gave the book two stars instead of one - benefit of the doubt.)
