This study aid features an innovative method of content organization. It uses outline-like checklists that are designed to lead students through the analytical steps necessary to evaluate and resolve property issues. Each chapter begins with a review and explanation of the important rules, concepts and principles that govern a particular area of property law. The review material is then synthesized into a checklist. Each chapter concludes with practice problems and solutions that illustrate how students can use the checklist to analyze property issues when writing their exams. Although other study aids may offer summaries of the law and practice questions, none offer the systematic analytical approach represented by the checklists in this book.

Great 1L supplement.

By Jay Long

This is a great supplement for the 1L year. All of the "Acing" books are well written, concise, and matter of fact. The entire series follows along with the general curriculum of classes (keep in mind that every professor teaches in the order he/she feels is best). This Property edition is no exception, it is not exact to the book my professor teaches, but it is a solid supplement to the themes and material taught in the course.

Won't Be Acing Anything with This Book

By Joe

The book is fine for a very basic understanding of property. However it does not dovetail any of the information. Further, the typical hardest part of any property class is the present and future interests which this book slaughters. It abbreviates everything, does not go into the differences nor does its graphs help explain anything. Stick with the Nutshell or Crunch Time books.
