Great Textbook, CDs not Mac compatible

By K. Piper-Fangman

I am just barely beginning to use this textbook in my speech pathology courses, but I do have one major complaint. The software, Anatesse, and studywares are not mac compatible. I was able to get the studywares cd to work on my mac by testing it out on a trial version of crossover mac, but the anatesse only shows the uninstall file..... Very annoying. No where on any of the info does it say what operating system is required. In addition one of my classmates is having issues running it on vista as well.... Fortunately Seikel the main author is the head of the department I am in so I will be able to complain to someone.....
