Good text

By Kelly R.

This easy to read text was a good book for helping me learn biology for my college classes. I really liked topics on animal structure and function and ecology. I also found Patrick Leonardi's "The Ultimate Study Guide for Biology: Key Review Questions and Answers with Explanations" vol 1, vol 2, and vol 3 to have excellent test preparation questions that guided me on the important points to study (and very helpful for my exams!).

This is an awesome biology book! I'm in 7th grade and I really enjoyed learning from this textbook in my science class. It is packed with information and easy to understand, but at the same time also goes in depth. I found it very interesting. There are so many different and exciting topics in it!
