A Classic for font designers

By Maldoror

Somewhat dated when it comes to some of the earlier digital technology discussed. No longer in print and hard to find, yet still more than worth the read if you are interested in designing fonts. Moye was the brain behind Fontographer and a very methodical thinker and writer. The book does not only cover the mechanics of designing a font but goes deep into the philosophy and practices of Detailed Typography.

Best guide out there for making your own fonts

By Thomas W. Phinney

In my day job as program manager for western language fonts at Adobe Systems, I'm often asked about books for people wanting to learn how to make their own digital fonts. This is the one I recommend first every time.

Stephen Moye has quite simply written the best and at this time the only complete guide to making your own fonts. Information on how to construct outlines properly, spacing, kerning and more is all here. Importantly, this book is NOT only useful for people using Fontographer (which is a sadly out of date tool now); most of the information is equally useful for those working with FontLab or other modern font creation tools.

Other books worth checking out for the would-be font-maker include Michael Harvey's Creative Lettering Today, Walter Tracy's Letters of Credit, and Alexander Lawson's Anatomy of a Typeface. Of course there's also Robert Bringhurst's classic Elements of Typographic Style, which should be owned and read by anyone who cares about type.

I liked this book so much that I personally hand-bound mine as a hardcover, to make it last. In retrospect,

with used softcover copies going for \$300 each, it seems like I had the right idea!

bad typesetting

By A Customer

Negative Remarks: While this book maybe full of useful information, it is difficult to read. The type is set 14/18 with half inch indents on paragraphs. Rule of thumb, 14 point type, 14 point indent. I felt like I was jumping to the next page when I started a new paragraph. It would be easier reading to have set the book in 12 point type, with 14 point leading, and 12 point indents.

Positive Remarks: If the typesetting weren't so bad, the font chosen for the book was very nice.
