## Review

Berger achieves his goal of providing a valuable resource to anyone interested in learning why they do what they do.

. . .this edition is updated while retaining its emphasis on fundamentals.

Berger includes thought-provoking review questions at the end of each chapter. . .

Berger provides valuable insight, an important training tool, and a useful resource.

-Security Management

## From the Publisher

This book is an update of a beginning text which has been used successfully in colleges and universities for twenty years. It updates the techniques of various specialties along with current technological approaches towards solving those security-related issues. It has left unchanged the philosophical, moral, and ethical approach to the security procedures, the abandonment of which has led to literally thousands of lawsuits against security departments and private guard companies, alleging "inadequate security" procedures, hiring and training. New technologies, in almost every subcategory of the security industry, have changed the profession forever. Computers have assumed much of the performance formerly conducted by both trained and untrained security officers. Skills have changed to a degree where knowledge is determined by one's level of computer awareness. This book presents many of those new techniques and developments.

## About the Author

David L Berger is a veteran of 44 years in private security and law enforcement. He began his career as a private investigator. During his 18 years as a guard company owner he developed primary techniques of security system design for major buildings and complexes within the retail, commercial, industrial, and residential fields. He pioneered the use of closed circuit television in security, having come from the broadcasting industry in the early days of television. He is experienced as a corporate director of security for major companies in Southern California and was possibly the first professional security consultant to become

involved in the forensic practice for civil litigation.
