It will not make you feel bored. Besides, this way will likewise boost your life quality.

THE FIRST YEAR OF TEACHING: CLASSROOM RESEARCH TO INCREASE STUDENT LEARNING (PRACTITIONER INQUIRY (PAPERBACK)) BY JABARI MAHIRI, SARAH WA PDF

"The First Year of Teaching offers us knowledge about urban schools which we could only get by academics and teachers working together. Documenting three themes concerning the complications of curriculum, culture, and control, we learn significant practices that make a difference for new teachers and their students. This is a must-read for teachers, researchers, and policymakers who want to improve urban education now."
--Ann Lieberman, senior scholar, Stanford University

For first-year teachers entering the nation's urban schools, the task of establishing a strong and successful practice is often extremely challenging. In this compelling look at first-year teachers' practice in urban schools, editors Jabari Mahiri and Sarah Warshauer Freedman demonstrate how a program of systematic classroom research by teachers themselves enables them to effectively target instruction and improve their own practice. The book organizes the teachers' research into three broad areas, corresponding to issues the new teachers identified as the most challenging:

- * Crafting Curriculum--how to engage students in learning curricular content, develop their abilities to meet standards, and prepare them for college or careers.
- * Complicating Culture--how to build on the different languages and cultures found in contemporary schools.
- * Conceptualizing Control--how to manage a classroom of 30 or more teenagers and create a climate where learning can take place.

The First Year of Teaching offers an array of classroom scenarios that will spark in-depth discussions in teacher preparation classes and professional development workshops, particularly in the context of problem-based, problem-posing pedagogies.
